THE SUMMER CLAS

NT-1

NANOCERAMIC METAL SURFACE
PREPARATION PRE-WASH

NT-1 PRE-WASH

Each of our metal frames are pre-finished with a nano ceramic pre-wash to increase paint adhesion. This important step pits the metal surface creating ten times the surface area for the powder coat of paint to bond to. All finishes are a high-solids polyester, architectural grade powder coat. The result is a paint finish that will last far longer than traditional powder coat processes.

Cast ALUMINUM

Superior grade molten aluminum alloy is hand-poured into a mold made from exceptionally detailed woodcarvings. Each casting is hand polished to provide a smooth, finished surface for painting. After a multi-step cleaning process, the furniture receives a baked-on powder paint coat, much thicker and harder than conventional wet paint, followed by a hand-applied antique accent.

SICS[®] DIFFERENCE

Wrought ALUMINUM

Features heavy tubing, strengthened at stress points with interior wall supports and galvanized steel inserts, triple hand polished 360° welds, and a high-solids polyester, powder-coated finish, Available in a variety of different finishes, our wrought aluminum products are as versatile as they are functional.

Wrought IRON

We have found a material that has the essence of hand worked 1/2" steel, bending and molding this product into extremely comfortable and elegant products. After being thoroughly cleaned and well dried, all of our wrought iron frames are dipped in an electrogalvanized bath. Each weld is hand polished to provide a smooth surface then finished with an architectural grade powder coating. We use the finest quality high carbon spring steel for our spring chairs for maximum comfort and resilience.

THE SUMMER CLAS

N-dura[™] ULTRA HIGH UV RESISTANT RESIN WICKER

The most realistic and extensive UV resistant protocol in the industry, *N-dura* resin wicker is guaranteed to not experience any significant color change for 5 years. Our ultra realistic resin varies in color and texture, making each piece unique. Available in resin, vinyl or polyethylene, all *N-dura* wicker is memory tested to 50,000 compressions, and is hand-woven over our steel-reinforced heavy gauge aluminum extrusions with a triple antique hand applied finish using nano-ceramic technology.

SUSTAINABLY HARVESTED *Teak*

The finest teak in the world was sought out to design our wooden furniture pieces. Teak Collections feature plantation grown high quality teak frames with mortise and tenon construction. All of our Teak Collections are available in Natural Teak and our Oyster Teak finish, which was designed to mimic the silvery gray patina teak develops as it ages.

SICS[®] DIFFERENCE

Maintenance + CARE

Summer Classics furniture is designed to withstand all types of weather with ease, making our products easy to maintain. Summer Classics now offers a complete line of outdoor furniture cleaners, developed for each of our individual materials and specifically designed to ensure our furniture lasts for years to come.

N-dura[™] RETICULATED OUTDOOR UPHOLSTERY

The durability of our patented *N-dura* resin wicker, with cushions built into the frame. Constructed using *N-dura* resin wicker upholstered around quick-dry reticulated foam, hand-woven over our heavy gauge aluminum extrusions with an architectural grade powder finish using nano-ceramic pre-wash technology.

THE SUMMER CLAS

FABRIC & CUSHION CLEANING

All Summer Classics fabrics are designed specifically for outdoor use and are naturally resistant to stains and fading. Prior to cleaning, we strongly recommend contacting the fabric manufacturer for specific cleaning instructions. Many household cleaning agents are harmful to the color and life of a fabric, and cleaning instructions can vary depending on the nature of the stain. In the catalog and pricelist, the fabric manufacturer is listed after the fabric number and grade.

COLORES™ Exclusive Fabric Collection

Any Fabric sold by Summer Classics is to be "SPOT CLEANED ONLY" Fabrics are not suited to machine washing, machine drying, or dry cleaning.

TO CLEAN: For standard maintenance, we recommend cleaning SC Fabrics with water-based cleaning agents or water-based foam to remove overall soil.

FOR REGULAR CLEANING: Frequently vacuum or lightly brush to remove dust and grime.

✓ PLEASE NOTE

Zippers are included for cosmetic purposes and added drainage only. **DO NOT REMOVE THE FOAM CORES** due to the tight fit and the difficulty with repositioning them when reinserted.

Reticulated Foam CUSHIONS

Most of our cushions are offered in a reticulated foam core option. The reticulated foam allows for easier water drainage, reducing drying time. The reticulated foam core has a density rating of 1.8 and an indentation load deflection of 30. This combination allows for a very comfortable sit.

Standard CUSHIONS

Our Standard Cushions are composed of bonded fiber layers on top of polyurethane foam, making them exceptionally comfortable. The ratio of foam to fiber is 50% to 50% once core is inserted into the fabric cushion slip.

Dream CUSHIONS

Dream Cushion™ by Summer Classics offers 1.8 density high resilient and California Fire Rated Foam for maximum comfort. Our woven, water-resistant jacket features a "pillow top" of blown-fiber channels providing the utmost quality and softness. Soft, durable, and water-resistant, this is truly the perfect cushion.
